Precipitate Rafting under Uniaxial Compression
$\sigma_{11}^{app} = -0.5\, G^m \varepsilon^T \quad (\eta = G\varepsilon_T^2 / A_b = 1)$
Soft ($\delta = 0.5$): elongates $\parallel$ σ_{11}
Stiff ($\delta = 2.0$): elongates $\perp$ σ_{11}
Circular (AR = 1)
Aspect ratio a_x/a_y
